DDBSP 2020
Explorer Version

Installation Notes

DDBSP - Dortmund Data Bank Software Package
Software Installation

1. Unpack the zip archive to a local folder. The following files are shown:

   ![Unpacked Files]

2. Run SetupStarter.exe to initialize the setup procedure.

3. The button *DDBSP 2015 Explorer Version* brings up a context menu with some options:
4. Click the *Start DDB/DDBST Installation* menu entry. The setup needs administrator privileges and therefore the Windows user access control (UAC) may request additional rights.

5. The setup starts with the *Welcome* dialog:

![Welcome dialog](image)

Click on *Next* to continue.

6. To proceed with the program setup please read the license agreement carefully, accept it and click *Next*.

![License Agreement dialog](image)
By confirming that you are a resident of a European country

The *EU GDPR Privacy Notice for EU Residents* will be shown in a separate window.

Otherwise you immediately proceed with step 7.

7. The recommended installation folder for the DDBSP Explorer Version is a subfolder of the Windows standard program folder. It can be changed by using the *Custom* button. *Typical* installs the DDBSP Explorer Version with recommended folder and file association and creates a shortcut in the start menu and on the desktop.
8. *Custom* allows to change the installation folder.

![Select Installation Folder](image1)

- desktop shortcut

![Configure Shortcuts](image2)
and file associations

9. Clicking on the *Install* button starts the installation.
10. The final dialog is the *Finished* dialog. It allows displaying the program manager dialog or starting the DDBSP JumpStart program directly. Please note that in case of an active UAC the programs will be started with administrator privileges.
11. The program manager group contains the following entries:

12. The first run of the DDBSP *JumpStart* brings up a settings dialog:
Requesting and Installing a License

1. Start the RLM Client Configuration from the *Additional* folder in the Windows program manager group.

2. Switch to the *Registration* page and fill the Company name or “Home” and a valid email address. Click then on *Online Registration Request* to send the license request.

3. The program shows the data sent to DDBST GmbH:
4. The DDBST license management system now creates the license in an automatic process. Typically within less than five minutes you should receive an email which looks like this

![Email Example]

Dear User,

this is an automatic reply from the DDBST license management system.

Please unpack the attached ZIP archive and use the "RLM Client Configuration" program to install the extracted license file.

The following information has been used to generate the license:

- Company: DDBST
- Email: [redacted]
- LIC_HOSTID: [redacted]
- HOSTNAME: [redacted]
- Activationcode: 0634507262-2020-E

Please contact support@ddb.de for technical support.

A copy of this email has been sent to the license management department of DDBST.

and contains an appendix with the zipped license file. Save this appended archive and unzip the license file.

5. Return to the RLM Client Configuration program and click on the Add License button on the Licenses page and select the license file:

![RLM Client Configuration 2020]

This was the final step in the installation. The Display Product button can now be used to display the available licenses.
Final Comments

The explorer edition is a limited version of the Dortmund Data Bank and the DDB software package and is intended only for test purposes and to show the possibilities of the full versions.

In case of any questions, comments or requests please don’t hesitate to get in touch with us using support@ddbst.com or the contact form on our web site www.ddbst.com.
