

Changes for DDB 2023 Update1

Release Date: 4 October 2023

Dortmund Data Bank

- Fixed: in the PCP export the constant values are always 0

Predict Mix / Predictive Methods / Regression Mix

- Fixed: errors in the Hayden-O'Connell vapor phase model

Predictive Methods

- Fixed: in the LLE prediction the pressure output is wrong (factor 1E-3)

Predict Pure

- Fixed: in the Fedors model there is a wrong group assignment of Iodine if connected to an aromatic atom
- New: for the Fedors model the user change the group assignment manually

Regression Mix

- Fixed: it is not possible to use the Aspen simulator as thermodynamic engine
