

Changes for DDB 2026 Update1

Release Date: 5 May 2026

Several prediction products

- Fixed: The calculation with PSRK fails if the acentric factor is available but Mathias-Copeman parameters are missing.

Process Synthesis

- Fixed: Under some circumstances, the calculation with a g^E model may use 0 values for missing parameters.
- Fixed [AZEOT]: Wrong miscibility gap and azeotrope information if the binary calculation fails.
- Fixed [AZEOT]: Wrong miscibility gap information in the quaternary calculation.
- Fixed: Several problems regarding regional settings have been resolved.
